J. B. DIDINGER & CO.,
Church Organ Manufacturers,
1022-28 Buttonwood St., Philadelphia, Pa.
Tubular Pneumatics a Specialty.

ST. JOHN'S RECTORY,
Lambertville, N. J.

January 10, '94

My dear Mr. Didinger :

It is a great pleasure for me to inform you that the organ you have completed for us gives perfect satisfaction. All the material used in its construction is strictly first class. In tone it is the *ne plus ultra* of the pipe organ, ranging from the sweetest strains, like to an Aeolian harp touched by a gentle zephyr, through the various gradations of each register, till finally bursting forth in the full organ to the grandeur and perfection of a complete grand orchestra. It is sweet, it is pathetic—vivacious and of great brilliancy. Its solo registers on both Swell and Great must be heard to be appreciated. His Excellency, Mgr. Satolli, the Apostolic Delegate, when present at the dedication of our church was charmed with it; and spent quite some time listening to each separate register and carefully examining the mechanism. He pronounced the soft registers "*heavenly*." The pneumatic action has done away with the labor of organ playing, and now after hours of practice—which are also hours of enjoyment—the player retires without the least physical exhaustion as formerly. After examining our organ I do not think any person will ever consent to have a tracker-action organ built. Whilst there are many larger organs in New Jersey, I am willing to assert that there is not one that, taken all in all, can equal ours. May you continue to give such satisfaction to all your patrons whom, I hope, may be very numerous. It shall always be a pleasure for me to allow free access to our organ to anyone contemplating purchasing an instrument from you.

I remain sincerely yours,

(Signed) WM. J. FITZGERALD,

Rector.
