2	Sforzando Indicator (light)
	Organ bench with music rack
	Concave Pedal

M. P. MOLLER INC. agrees to rebuild the organ in the Epiphany R. C. Church, Pittsburgh, performing the following work and supplying all materials to carry out the work specified. The work involved constitutes - first, changing the present system of tubular-pneumatic action to electric action, using the present wind chests, but furnishing an entirely new console, new electric blower and action current generator, electro magnet boxes for each division of the instrument, new mechanisms for the speaking front pipes, two accordion type motors to operate swell shades, new tremulants, the reed stops to be revoiced with new tongues, all the pneumatics operating the organ valves, including stop action, pneumatics to be renewed with the best grade of pneumatic leather, all pipes that are damaged in any way to be thoroughly repaired, and the entire organ to be thoroughly cleaned, all pipes tone regulated and retuned, and every part put in first class condition.

Describing the valve work, it is proposed that we use the latest standard type Moller console, with sterling silver electrical contacts of the design approved by the American Guild of Organists, and in detail similar to the Moller console in the Church of the Resurrection, Crocodmore Avenue, Brookline, Pittsburg, all wiring between the console and organ to be built after special formula which is the standard in all Moller organs; all magnets to be the new Moller type with self-contained armatures, and every part of the work covered under this contract to be done in the latest approved manner.
