

New Pipe Organ.

During the past few weeks the representatives of several builders of pipe organs have been in Montrose to estimate on the new organ for the Methodist church.

At a special meeting of the official board Monday evening the contract was let for one, to the Staub Company, of Syracuse. It is a larger and better organ than was first talked of by the society, and will have a number of new and up-to-date features, and a design very striking. It is to be 19 feet high. The contract calls for its completion in two months. It will have 884 speaking pipes.

Montrose Meth new organ
