

LARGE PIPE ORGAN FOR GRACE LUTHERAN CHURCH AT MACUNGIE.—The Ladies' Aid Society of the new nearly completed Grace Lutheran Church at Macungie last winter entered into a contract with Durner, the great pipe organ builder at Quakertown, for placing a large instrument in the edifice, and all the parts having been completed they were delivered last week, and the work of setting up the organ is now in progress. It has 21 stops and 6 combination pedals to operate the draw stops for making various and pleasing combinations. There are 27 notes in the pedal organ and balanced swell pedal, which operates the vertical shades of the swell organ. The front pipes are all speaking, and richly decorated in gold, silver and colors, while the casing is of Gothic style and finished in white and gold, to correspond with the pulpit and altar of the church. The organist's keydesk is extended over 10 feet from the organ so as to allow room for the choir, the organist facing the congregation. The tone of the whole organ promises to be very fine, and the workmanship throughout is of the highest order.

Grace Luth Macungie Durner
