Six Combination for Great & Pedal with couplers, Six
for Swell and six Master pistons. Toe pistons, Great to
Pedal reversible. Sforzando piston, six master duplicates.
Balanced Great expression pedal, Swell expression pedal
and crescendo pedal. Crescendo indicator, sforzando indicator,

Wire the console for 73 pipes and 32 in the pedal. They may later want it. They want the Vox Humana so make a set of Vox Humana with chest and box, voice it for real music. 4 inch and pitch like you always do 435. or 440. The rest of the stops I do not know if I can get them to take them now. Might use old blower too. I want at least a modern console and later add.

Enclose a sketch of windows if you wish to make panel accordingly. The case will be oak plain, will send finish later. Send me a floor plan sketch where 3" tube will come up so I can get that in now.

Send me two swell motors of your regular type. I want to have their carpenter make the shades.

Also send me 500 magnets, send them at once. Hope they will all be good. Send the console and Vox Humana to the First M.E. Church, New Ulm. They pay the freight on this. The magnets send to me. You probably have to take \$1000 in notes at 6% for one year. The others when organ is installed. Hope this is O.K. When can you ship console?

Make a fine job of everything even if it is not for a Reuter organ. Send me ten of your bellows springs *with loops* or like you use for swells too. If I need more material will send for later.
