

the regular boards of the convention.

Six stops have been added to the splendid new pipe organ of Second Baptist Church, and, with this addition, the organ is now furnished with its full number of stops. These six new stops operate 480 pipes. The organ was first used in public worship on the day of the dedication of the new church edifice, October 30, 1910. Next Sunday, the organ as now completed, will be heard for the first time. The \$800 for these additional stops have been raised by the church. The organ is valued at about \$5,000.
