SPECIFICATIONS

PITCH GENERAL

A-440

The new organ chamber approximately 19' high, flat ceiling, 20' wide by 16' deep, is satisfactory. The church to install partition wall, from front to back and from floor to ceiling, behind organ grille, leaving tone opening in each chamber 7' wide by 13' high. This is necessary in order to deflect the tone in the Great Choir chamber to the tone tunnel to chapel. All preparations in the church to be made at the church's expense, from plans by M. P. Moller, Inc. The firm reserves the right to use as many of the pipes of the present organ as will be adaptable to this specification.
