

NEW ORGAN

Is Being Erected At The First Presby- terian Church

The pipe organ for the Presbyterian church which was purchased from M. P. Moller of Hagertown, Maryland, has arrived and is now being erected by three young men who are specialists in organ building. It is a three manuel organ, and has 32 stops, besides a set of chimes consisting of 20 tubular bells. The wind for the organ is furnished by a Kinetic blower. It has all the modern conveniences that are known to the art of organ building.
