

CONTRACT

It is this day agreed by and between the ESTEY ORGAN Co., of Brattleboro, Vermont, party of the first part, and the Trustees of the

AUSTIN AVENUE METHODIST EPISCOPAL CHURCH, SOUTH, WACO, TEXAS,

party of the second part, as follows:—

The party of the first part agrees to build an organ in accordance with the annexed specifications, which are hereby approved and made part hereof, and erect the same in their church edifice, complete and ready for use, on or before the 25th day of December A. D. 1907 or as soon thereafter as possible.

Should said organ, upon examination made as hereafter provided, be found not to comply with the terms and specifications of this agreement, then the party of the first part agrees that it will, at its own cost and expense, make good such defect, or, failing in this, will remove said organ.

The said party of the first part further agrees that it will, at its own cost and expense, at any time after the completion of said organ, remedy all structural defects therein, if any, natural wear, damage done by fire, water or other cause not connected with the construction of said organ, excepted.

The said party of the second part hereby agrees to pay to the said ESTEY ORGAN Co., the party of the first part, upon the completion of said organ, the sum of

Twenty-seven hundred and fifty (\$2750) dollars as follows: \$1800 cash on completion and acceptance of the organ, and note for \$950, payable in six months thereafter, with interest at 6%.

The said party of the second part agrees that said ESTEY ORGAN Co., or its representative, shall have uninterrupted possession of said building, properly heated and lighted, for the purpose of erecting, regulating and tuning said organ, for a period of six days next previous to the completion of said organ.

The said party of the second part hereby agrees to test and examine said organ immediately upon completion of same, in presence of the representative of said party of the first part, and, if found in accordance with specifications hereto attached, will then accept and settle for same in accordance with the provisions of this contract.

The said party of the second part hereby assumes all risk of damage to said organ, or parts thereof, while contained in the premises of said party.

It is also agreed that if a water motor is to be furnished, the party of the second part shall do all piping and plumbing necessary to operate the same, so that the motor may be connected by the party of the first part without delay.

It is further agreed that all mason and carpenter work necessary for a satisfactory foundation for both motor and organ shall be done by the party of the second part.

It is also agreed that if an electric motor is to be attached the party of the second part shall do all the wiring necessary to connect the motor.

It is further agreed that if the party of the first part is subjected to any expense by reason of delay in the aforementioned preparation for organ or motor said expense shall be borne by the party of the second part.

Witness our signatures at Brattleboro, Vt., this 22nd day of

July A. D. 1907

The organ to be built shall be of the highest order of excellence, with the proper volume throughout.

With a view to securing the greatest possible durability and

DETAILS OF CONSTRUCTION.

Vermont

The Case is to be constructed of native hard wood of appropriate design; the large metal pipes in front to harmonize with the interior finish of the building. ^{Blue print of the design to be submitted by party of first part and accepted by party of second part.}

The Ground Sill is to be extra heavy and with the upright frame is to be rigidly constructed of well seasoned material, every portion firmly put together.

The Swell Box is to be constructed of heavy material framed together. The shades to be vertical, to swing on metal pins, bushed with felt, and so constructed as to ensure tight closing and noiseless operation. ^(Adjustable) Swell Organ Forte (Adjustable).

The Bellows is to be of ample size to supply sufficient wind for the greatest possible demand. It is to be framed, with the panels screwed on, and is to be double leathered with the best alum tanned sheepskin.

The Wind Chest is to be pneumatic, each pipe to have its separate supply of wind so that there shall be no robbing or unsteadiness of speech. The use of compressed air through pneumatic tubes to operate each individual valve avoids complicated levers and kindred devices, and ensures instantaneous operation.

The Haskell Patent Key Stop Action is to be used. It is an abridged keyboard placed just above the manuals. Each white key when depressed brings on the pipes or couplers indicated on the front of the key. Depressing the black key closes the same.

The Action, including the Manuals, Pedals and Stop Action, is to be Tubular Pneumatic.

The Wood pipes shall be made of selected stock. The large Metal pipes are to be made of the best quality of zinc. All other metal pipes are to be made of a composition of tin and lead, of which not less than forty-five per cent shall be tin.

The Scale of all pipes shall be in accordance with the best standards, and the voicing shall be of the highest order of excellence, with the proper volume throughout.

With a view to securing the greatest possible durability and utility none but the best and most approved materials and methods of construction shall be used in any part of the instrument, so that the complete instrument shall be of the highest order of excellence.
