

The beautiful organ at St. Luke's Presbyterian Church was built and installed in 1987 by the Schantz Organ Company. The organ was custom designed and voiced especially for an acoustically excellent sanctuary.

Each pipe is handmade and speaks as a singer "sings". Pipes have feet, mouths, tongues, ears and sometimes beards. The organ's palette of tonal colors ranges from softest string sounds to vibrant festival trumpets.

The Schantz organ at St. Luke's has 2148 pipes, 37 ranks, 3 manuals (keyboards) and contains a set of 21 tubular chimes and a cymbalestern (small bells used for festive occasions).

The instrument is well suited to playing all music from meditative communion hymns to the most demanding recital literature.
