

M.P. MOLLER

Pipe Organ No. 5819 Date September 29, 1930  
For Convention Hall, Philadelphia, Pennsylvania  
Action Electric Console Detached on elevators  
Casing No. None Finish Solid Mahogany - Inside; Walnut Exterior  
Decorations None Motor 2 - Electric  
Width of Key-bed \_\_\_\_\_ Stop Controls Draw Knobs - Circle Stop Keys  
No. Manuals 2 - each Four Wind Pressure See specification  
To be completed July 1, 1931 Blower pipe furnished by Moller

### S P E C I F I C A T I O N S

#### GENERAL DETAILS

The Organ Builder will furnish, deliver, hoist and install complete in all details including conduit, blower pipe, wiring, etc., an Organ, as hereinafter specified, with two (2) Consoles and Automatic Player. One (1) Console to be of stop knob concert type, the other console of the unit type, each to have four (4) manuals of the compass C<sub>4</sub> to G<sub>4</sub>-6<sub>1</sub> notes. Pedals, compass C<sub>3</sub> to G-3<sub>2</sub> Notes.

#### ACTION

To be electro pneumatic action throughout.

All wiring shall be run in conduit unless otherwise directed, same shall meet the code of the National Board of Fire Underwriters.

Consoles to have manual keyboards inclined and all keyboards hinged for convenient access to contacts. Pedals A.B.O. pattern, corrected scale, CONCAVE AND RADIATING.

Pitch, Philharmonic, 440-A, 523.3-C.

#### DETAILS OF CONSTRUCTION FRAMING

The framing of the Organ, including both floor frame and building frame, shall be so made to support the pipe chests and reservoirs in a solid and substantial manner, according to detail and drawings to be submitted by this Contractor. Framing shall be of heavy, well seasoned Douglas Fir, free from knots, checks, sap or other imperfections.

#### WIND DISTRIBUTION

The wind conductors distributing the air from the organ reservoirs in the organ chambers to the various organ chests and actions to be made of wood or metal according to the area desired. All conductors requiring thirty (30) square inch or more sectional area to be made of white pine of oblong or square section, sides to be 13/16" thick to be glued and screwed together, with flanges made of hard wood; and where they are attached to the organ parts,

WIND DISTRIBUTION(Cont'd)

supplied with leather packing backed up with compression felt. All wooden conductors to be supplied with flexible joints. All conductors of thirty (30) square inches or less sectional area to be made of galvanized iron, painted before shipment, of round section, with all seams soldered air tight, fitted with metal collars soldered to the conductors, to be screwed to the parts connected with a leather packing. Wick or glue joints will not be permitted.

The wind supply for all divisions must be entirely adequate so that there will be no fall from desired pressures under any playing conditions. There must be no robbing or dropping in pitch in any voice or division under any playing condition.

WOODWORK

All of the woodwork used in this Organ shall be of the best quality throughout, free from imperfections, knots, checks, or sap. All wood must be thoroughly planed and sanded to a smooth finish, wherever worked, all tool marks must be eradicated. The wind chests shall be made of No. 1 white pine throughout, with the exception of the pitman valve seats which shall be made of poplar and burnished to a smooth seat, and the valve stem guides and wire guides which shall be of hard white maple. The wind reservoirs shall be made of No. 1 white pine. Relays shall be made of No. 1 white pine. Couplers and switch boards shall be made of hard white maple.

All woodwork must be protected by a waterproof covering of an approved shellac coating of three (3) coats applied in a suitable and workmanlike manner. This shall apply to all interior parts as well as exterior parts, and particularly to the interiors of wind chests and reservoirs.

All action parts containing borings shall have the walls of such borings thoroughly saturated by dipping them under hot varnish of pure shellac.

All gluing is to be done with the best grade of hot, animal glue, and the surfaces to be glued are to be heated before gluing. All gluing to be done with the surfaces held together with sufficient compression to drive out all surplus glue and bring the surfaces themselves into contact with each other.

The wind reservoirs or regulators shall be made of the single fold type with the pressure produced with coil or other approved springs and shall operate with a positive valve with means for adjusting the amount of opening in relation to the fall of the reservoir top.

Tremolos to be made adjustable for speed and depth of beat. Tremolos shall be made of No. 1 white pine.

ACTION

The action to be of the Electro-Pneumatic type. It must be reliable in operation, giving instant attack and release, and rapid repetition. All key, relay and stop action contacts shall be of metal of the following analysis: Silver .925%, Copper .075%. This same metal shall be used for both elements of the contact. The motion of the movable element is to be such so that a slight rubbing together of the two elements is effected when they are brought into contact with each other to keep the contact surfaces polished.

ACTION (Cont'd)

All electrical connections throughout the organ in the organ action circuits shall have soldered joints which must be washed off with alcohol after soldering to remove the surplus flux.

The main cables shall be machine made with copper wire tinned, coated with enamel insulation and covered with two (2) layers of cotton insulation. The wires forming any cable to be saturated with paraffin and covered with two (2) layers of paraffined paper, and over this is to be woven a braided covering covered with flameproof paint. All interior wiring shall be made of cables of this same specification except that the wires shall not be enameled. No cables covered with friction tape will be permitted except in the interior wiring of the relay, the interior wiring of the console, or to magnet boxes containing six (6) or less magnets.

The chest action shall be of the type known as individual valve type.

SWELL ACTION

The swell expression shutters of wood shall be 2 1/4" thick made of solid wood formed by gluing together 2" wooden strips so that a lengthwise lamination is effected to prevent warping. Each shutter shall have an individual pneumatic to open it and an individual spring to close it. These pneumatic motors to be mounted on the swell frame and to operate directly on its shutter and on no other shutter. Each set of shutters shall have the proper swell engines for expression control.

CONSOLES

There shall be two (2) consoles provided with the organ. One shall be of the concert type provided with stop knobs and the other of the theatre type. Each console shall have four (4) manuals and pedals; the outside cases shall be of suitable hard wood to match the interior wood work of the auditorium, and the interior woodwork of the consoles to be of mahogany. The wood used for the action boxes and keys to be white pine and switch boards and coupler switches to be of hard maple. The concert console is to control such portions of the organ that are designated in the specifications, and is to have the stop controls made in the form of knobs distributed in two (2) vertical jambs set at an angle of forty-five (45°) degrees to the line of the manual keys located on either side of the manual keys. The faces of these knobs to be of solid ivory and the printing is to be engraved thereon. The couplers to be controlled by solid ivory tablets located in a single row over the top of the fourth manual keys. The manual keyboards are to be preferable inclined and the pedals concave and radiating. A plumb line dropped down from the top of the lowest manual natural key shall intersect the line of the pedal natural keys at a point 9 1/2" from the point of the pedal sharp. The line of the tips of the manual natural keys shall be 2 1/2" apart horizontally and 4" apart vertically.

PIPES

In the construction of the metal pipes the following metals and alloys will be used: Tin, which is understood to be ninety (90%) percent tin and ten (10%) percent lead. Common metal, which is understood to be thirty three

PIPES (Cont'd)

and one-third (33 1/3%) percent tin and sixty-six and two-thirds (66 2/3%) percent lead. Spotted metal, which is understood to be forty-five (45%) percent tin and fifty-five (55%) percent lead. The lead and tin alloys are to be cast metal and the zinc rolled. These metals to be used as designated in the pipe specification. Only the bottom two-thirds (2/3) of any reed pipes may be made of zinc. All wedges used to fasten the reed tongue in the block shall be brass. No wood or fibre permitted. In diapason sets zinc may be used for the bodies of only the eight (8) pipes of lowest pitch in 8' pitch set. In strings, zinc may be used for the bodies of only nine (9) pipes of lowest pitch in an 8' pitch set. Slide tuners are to be used for all cylindrical pipes and all conical pipes where the top is smaller in diameter than the bottom of the body. Only white pine and maple may be used in the construction of the wooden pipes for the wooden parts. All wood pipes of 2' pitch or higher shall have maple fronts and backs.

AUTOMATIC PLAYER

An automatic player in a separate cabinet to be located in the stage managers office, to be provided with this organ, and bidders must furnish details of Automatic Player. The player to be operated by hand, recorded music with automatic control of the entire registration of the concert console and individual automatic control of the small shutter mechanism. The player action is to have not less than forty-eight (48) separate changes of registration which can be used individually or in any combination of this number.

Furnish not less than twenty (20) player rolls as selected.

WIND PIPES

The Organ Contractor shall provide the necessary wind pipes from the main blower to the various divisions of the Organ, and from the Console blower to the consoles. He shall also provide a wind pipe from the main organ or blower to the manager's office to supply wind for the player cabinet. These wind pipes to be made of galvanized iron of not less than twenty (20) gauge for pipes of 1 1/2" in diameter or over, or not less than twenty-four (24) gauge for pipes less than 1 1/2" in diameter. All joints and seams of these pipes are to be soldered airtight; a flexible rubber hose to be provided for each console to allow for the movement of the elevators. These rubber hoses to have spiral steel springs built into them to prevent their being damaged by the movement of these elevators.

DRAWINGS

The Contractor for this work shall furnish detail drawings showing layout, location of conduits, piping, etc. for Architect's approval.

ANALYSIS BY CHAMBERS, PRESSURES, AND TREMOLO

GREAT CHAMBER  
20" Wind Section - Brass Tremolo

1	32'	Contra Bombarde - unit - Pedal only - all reeds...68 pipes..no Tremolo
2	16'	Trombone..straight - Great - all reeds.....61 pipes..24 off Trem.
3	8'	Tromba..harmonic..straight - Great - 56 reeds.....61 pipes..12 off Trem.
4	4'	Clarion..harmonic..straight - Great...44 reeds.....61 pipes—spotted metal

10" Wind - Foundation Tremolo

5	32'	Double Open Diapason - unit - Pedal only no tremolo.....68 pipes
6	16'	Double Open Diapason - unit - 28 scale 20 zinc - 24 off Tremolo.....85 pipes
7	8'	First Open Diapason - straight - 36 scale heavy 2/9 mouth - 12 off Tremolo.....61 pipes
8	8'	Second Open Diapason - straight - 39 scale 2/9 mouth - 12 off Tremolo.....61 pipes
9	8'	Third Open Diapason - straight - 43 scale 1/5 mouth - slotted 12 off Tremolo.....61 pipes
10	8'	Fourth Open Diapason - straight - 46 scale 1/7 mouth - spot metal.....61 pipes
11	4'	First Octave - straight - 52 scale - 2/9 mouth....61 pipes

Solo to Choir 8'	Choir to Swell 8'	

ADJUSTABLE COMBINATIONS:

Ten toe pistons affecting Pedal Stops.

Ten pistons affecting Great Stops, corresponding: Pedal on 2nd touch

Ten pistons affecting Swell Stops, corresponding: Pedal on 2nd touch

Ten pistons Affecting Choir Stops, corresponding: Pedal on 2nd touch

Ten pistons affecting Solo Stops, corresponding: Pedal on 2nd touch

Ten universal pistons affecting stops and couplers of entire organ.

Four cancel pistons affecting stops and couplers of respective manual groups.

Universal cancel piston

Coupler cancel piston

## MANUAL ACCESSORIES

- 1 Locking slides - any or all expression shades to any expression pedal.
- 2 Sforzando - reversible piston with light indicator
- 3 Mezzo - reversible piston with light indicator
- 4 Great to Pedal Coupler - reversible piston - moving stop control
- 5 Swell to Pedal Coupler - reversible piston - moving stop control
- 6 Choir to Pedal Coupler - reversible piston - moving stop control
- 7 Solo to Pedal Coupler - reversible piston - moving stop control
- 8 Graduated indicators with light for positions of Crescendo and each Expression Pedal numbers 14-18 inc.
- 9 Three spare signal lights
- 10 Voltmeter
- 11 Three blank signal pistons
- 12 Piston cancelling tremolos and expression pedals on unit console
- 13 Electric switch buttons for remote control starter

## PEDAL ACCESSORIES

- 14 Balanced Expression Pedal - Great Chamber
- 15 Balanced Expression Pedal - Swell Chamber
- 16 Balanced Expression Pedal - Choir Chamber
- 17 Balanced Expression Pedal - Solo Chamber
- 18 Balanced Crescendo Pedal - not moving stop controls
- 19 Locking Pedal - All Expressions to Solo Chamber Pedal #17
- 20 Sforzando stud - reversible - duplicating #2
- 21 Mezzo stud - reversible - duplicating #3
- 22 Piano Sostenuto Lever
- 23 Piano Soft Lever
- 24 Chimes Dampers stud - reversible - with light indicator
- 25 Chimes Soft Lever
- 26 Harp Dampers Stud - reversible - with light indicator.

Organ bench with adjustable back and height adjustment - finish to match console.

UNIT CONSOLE - CIRCULAR - STOP KEYS  
(Stop Numbers refer to analysis)

## COMPLERS

217	Accompaniment to Pedal 8'
218	Orchestral to Pedal 8'
219	Orchestral to Accompaniment 8'
220	Solo to Accompaniment 8' (Second Touch only)
221	Solo to Accompaniment 4' (Second Touch only)
222	Solo to Orchestral 8'
223	Solo to Orchestral 4'

18.

### COUPLERS (Cont'd)

224 Solo to Orchestral 6-2/5'  
225 Solo to Orchestral 5-1/3'  
226 Solo to Orchestral 4-4/7'  
227 Solo to Orchestral 8' (Second Touch only)  
228 Percussion to Solo 8'

### VIBRATOS

229 String - Draws V, X, XIII  
230 Tibia (Special Slow Regulation) - Draws XII  
231 Tuba - Draws XIV  
232 Vox Humana - Draws VII  
233 Brass - Draws VI  
234 Wood Wind - Draws II, IV, IX, XV  
235 Foundation - Draws I, III, VIII, XI

### EFFECTS

(By Push Buttons)

236 Two Birds  
237 Two Sleigh Bells, different notes  
238 Auto Horn  
239 Fire Gong, stroke  
240 Telephone Bell  
241 Steamboat Whistle  
242 Locomotive Whistle  
243 Siren  
244 Factory Gong, reiterating  
245 Surf  
246 Door Bell  
247 Aeroplane

(By Spring Foot Levers)

248 Chinese Gong, (Roll, first touch; stroke, second touch)  
249 Persian Cymbal, (Roll, first touch; stroke, second touch)  
250 Grand Crash  
251 Thunder Crash, graduated  
252 Thunder Soft Roll, graduated

(By Toe Pistons)

253 Triangle  
254 Two Birds (separate chambers)  
255 Glass Crash

### ADJUSTABLE COMBINATIONS

(Adjustable at the bench by the pistons)

10 and 0 toe pistons affecting Pedal  
10 and 0 double touch pistons affecting Accompaniment and Pedal  
10 and 0 double touch pistons affecting Orchestral and Pedal  
10 and 0 double touch pistons affecting Solo and Pedal

10 and 0 double touch pistons affecting Percussion and Pedal  
 10 Universal pistons affecting entire organ  
 Five cancel pistons affecting respective manual groups  
 Universal cancel piston affecting entire organ  
 Vibrato cancel piston  
 Drum piston; military drums and cymbal, manual and pedal, adjustable  
 Trap cancel piston.

ACCESSORIES  
 (Manual)

- 1 Five locking slides to connect any of all expression to any balanced pedal
- 2 Graduating indicators for position of balanced Pedals
- 3 Sforzando
- 4 Pistons connecting individual manuals to crescendo and Sforzando
- 5 Indicating lights for sforzando and other blind movements
- 6 Piston cancelling tremolos and expressive shoes main console
- 7 Action current indicator - volt meter
- 8 Change title button
- 9 Signal button
- 10 Remote control starter buttons
- 11 Signal light

(Pedal)

- 12 Four balanced expression pedals
- 13 Locking Pedal to connect all expression to master pedals
- 14 Balanced Crescendo Pedal
- 15 Balanced Sforzando Pedal
- 16 Balanced Chimes sustaining Pedal
- 17 Balanced Chimes soft Pedal
- 18 Balanced Piano sustaining Pedal
- 19 Balanced Piano soft Pedal
- 20 Balanced Celesta sustaining Pedal
- 21 Balanced muffled drum Pedal
- 22 Balanced change - title Pedal

Organ bench with adjustable back (adjustable for height)
