CASING:—Cabinet casing of black walnut wood, after standard design. These can be had in oak wood, on special order.

light socket and play. A touch up of tuning is made by us after installation.

KEYBOARDS:—The keyboards, both manual and pedal, are of standard scales of the overhanging type, and the console measurements throughout are those approved by the American Guild of Organists.

PIPES:—The scaling and construction of the pipes, both wood and metal, are the result of months of study to secure the very best to conform to the size of the organ for the individual purpose for which it is to be used. Metal pipes are made either of the best quality of annealed zinc, or of special alloys of pure tin and lead in such proportions as required to produce the best quality of tone in each stop.
