The Immanuel Baptist Church is pleased to welcome you to this significant event of great music. It is hoped that there will be other occasions like this on which you and your friends will always be most cordially welcome. The offerings received on these occasions become the only means by which great artists may be secured and the other heavy expenses involved may be met. Your response, according to your ability, will encourage the church in this effort and enable it to make future plans. Such activities are planned for the spiritual and cultural enrichment of the Harbor Area.

Organ "Notes"

The new pipe organ in our church is a composite memorial to the friends and loved ones of our constituency. The loan for its purchase is being repaid by gifts, either as memorials to individuals, or out of thankfulness to God for His ceaseless blessings — memorials to His goodness. It is hoped that as the rich tones of the instrument rise to inspire the listeners, many will discover here an opportunity to share in this project, receiving the inner satisfaction of a significant part in "the gift that keeps on giving."

The Aeolian-Skinner Organ Company, of Boston, Massachusetts, has long enjoyed the distinction of having built America's most notable instruments. Its tradition and reputation are under the constant surveillance of Mr. G. Donald Harrison, the company's scholarly President. In this factory, the materials of wood and metal are fashioned into the physical substance of organ tone. The workmen ply their trade in an unhurried atmosphere, and are endowed with a spirit of skill reminiscent of the Master Craftsmen of the Ancient Guilds.

The organ arrived in Long Beach in early November. Weighing five tons, it was installed in specially prepared chambers, with as many of its pipes exposed as was possible. This is the first pipe organ in the entire Western United States to be so installed. It was dedicated publicly on February 28 of this year.
