

(PS) The pipes are in an odd order, + G's sits inside the case, but that's the best way I could figure the pipe feet length.

Ken: Both the "Tree of Life" designs and the pipe shades should be interchangeable - I've no money for carving on this case. Scale is $\frac{1}{2}" = 1'$. The left side of the case must be solid plywood panels: it is doing double duty as the Swell box's second wall. The right side is irrelevant: it faces a wall, 3' away.
