M. P. Moller, Inc., has the privilege of using any of the pipes of the present chapel organ that are adaptable to the foregoing specifications. It is understood that all such pipes will be repaired, revoiced and rescaled in the factory of M. P. Moller, Inc., and will be guaranteed to be in first class condition when installed in the new organ.

With the exception of the above mentioned pipes, all parts of the organ to be entirely new; exclusive of decorative screen or case work.

M. P. Moller, Inc., further agrees:-

7. To remove the present Haskell Organ, in part or in whole, from the present Chapel, as may be directed, within one week after written notification is received from the Church.
8. To install necessary equipment in the console for signaling between the organist, minister and ushers; said equipment to be furnished by the purchaser and installed while the console is under construction at the Factory.
9. To provide in the console space for an electric rheostat, for Church lights, and install the equipment, if furnished, at the factory while the console is under construction.
10. To install adequate lights for the pedal keys and couplers, and a connection for the music rack light fixture.
11. To install a Westinghouse or General Electric motor of ample capacity on the blower unit, for the ultimate organ.
12. That the swell shade action will be so designed that the shades automatically open when the wind is turned off.
13. That the organ will be designed so that all facilities will accommodate the ultimate organ as described, including that portion for which the Architect is responsible, with the exception of the chest and pipes.
14. To confer with the Architect in all matters relating to the installation of the organ and the construction of the Church, so that a definite understanding will be reached in regard to the division of responsibility and costs.
